

CRUISE CONTROL.

This super fun all rounder is ideal for almost everyone. Perfect for the beginner just starting out, the evenly balanced float gives an easy paddle onto the wave without the bulk. We made sure it still packs a punch though with a progressive design profile for those wanting to throw some water around.

Whether your starting out, on the improve or after a funboard for all conditions, it's a board that will grow with your ability and sure to be around in your quiver for a long time to come.

Length	Width	Thickness	Skill level
7'2"	21"	2 7/8"	beg - adv
7'8"	22"	2 3/4"	beg - adv

With the highest strength-to-weight ratio on the market, customized flex patterns and years of proven research and testing in epoxy composite surfboards, we take your surfing performance to the highest level. Designed and built in New Zealand by a team of dedicated board builders, shapers and surfers.

All Carbon Art boards are individually hand built to your order using cutting edge composite sandwich construction and advanced vacuum technology, to make you the best performance board possible. A board that's stronger, lighter, faster, provides years of surfing and feels as good as the day you bought it.

SUPERIOR STRENGTH

Design engineered composite sandwich construction provides for the ultimate in strength and performance longevity.

CUSTOM OPTIONS

Custom design your board online and order direct. Flex pattern tuning, coloured sprays, optional extras, it's your call.

We build your board for you - no off the shelf moulded popouts means the ultimate combo of technology and customization.

VALUE

Performance tuned board that stands up to the heaviest wave conditions and continues to perform at its peak far longer than a standard surfboard.

Materials we use create up to 2/3rds less VOC emissions (that cause air pollution and health hazards) than standard PU construction. A step in the right direction for valuing our environment.

FLEX PATTERN TUNED

We tailor the construction of each board model and size for the ultimate in flex response and feel on the wave.
