

MAXIMUM VERSATILITY. carbon art

The stand up board that does it all. Designed for maximum versatility the Carbon Art SUP excels in almost everything.

Stable and easy to paddle, it glides on the flat water and carves smooth lines in the surf. More advanced riders will appreciate its forgiving nature allowing the board to be ridden aggressively. The shape features a low entry rocker with subtle vee in the nose section fading towards the tail. 50/50 rails soft till the tail where a hard edge has been shaped for controlled release.

This all around performer is suitable for any ability level, beginner to advanced you'll be enjoying this board for a long time to come!

Length	Width	Thickness	Skill level
10'2"	28 1/4"	3 3/4"	int - adv
10'6"	30 1/4"	4"	beg - adv
11'	31"	4"	beg - adv

With the highest strength-to-weight ratio on the market, customized flex patterns and years of proven research and testing in epoxy composite surfboards, we take your surfing performance to the highest level. Designed and built in New Zealand by a team of dedicated board builders, shapers and surfers.

All Carbon Art boards are individually hand built to your order using cutting edge composite sandwich construction and advanced vacuum technology, to make you the best performance board possible. A board that's stronger, lighter, faster, provides years of surfing and feels as good as the day you bought it.

SUPERIOR STRENGTH

Design engineered composite sandwich construction provides for the ultimate in strength and performance longevity.

CUSTOM OPTIONS

Custom design your board online and order direct. Flex pattern tuning, coloured sprays, optional extras, it's your call.

We build your board for you - no off the shelf moulded popouts means the ultimate combo of technology and customization.

VALUE

Performance tuned board that stands up to the heaviest wave conditions and continues to perform at its peak far longer than a standard surfboard.

Materials we use create up to 2/3rds less VOC emissions (that cause air pollution and health hazards) than standard PU construction. A step in the right direction for valuing our environment.

FLEX PATTERN TUNED

We tailor the construction of each board model and size for the ultimate in flex response and feel on the wave.
